Spyderco™

REVEAL™

VOLUME
ELEVEN

Welcome to Spyderco's “Reveal” Volume 11!

Welcome to Spyderco's “Reveal” Volume 11, our third new-product announcement of 2022. This Reveal proudly presents our newest products and supplements our 2022 Product Guide and Reveals 9 and 10 to offer a complete reference of our current product line.

The knives and accessories presented in this Reveal were designed to appeal to the broad spectrum of Spyderco customers. Those who look to us for reliable, utilitarian cutting tools will appreciate evolved versions of Spyderco mainstays like the workhorse Ambitious™, the Endura®4 Lightweight, and the compact Lil' Native®. Steel-obsessed knife enthusiasts will find everything from upscale working knives in CPM® S35VN™, K390, CPM S90V®, CPM CRU-WEAR®, and state-of-the-art CPM 15V® to a stunning Sprint Run™ in Damasteel® Thor™ Damascus. If you're looking for new models or reimagined expressions of Spyderco classics, you'll find them in the LeafJumper™, Lil' Temperance™ 3 Lightweight, and the G-10-handled version of the Stretch™ 2 XL. Finally, if you want to show your pride in being a member of the Spyderco community, we've got brand-logoed accessories ranging from a Spyderco by Vanquest® backpack to hats to a BenShot® shot glass.

No matter what kind of Spyderco follower you may be, we are confident you will find something within these pages that excites you. Thank you for your continued support and passion for our products!

Respectfully,

The Spyderco Crew

Stretch™ 2 XL
Gray G-10
CPM CRU-WEAR®
C258GPGYCW

Spyderco's Stretch 2 XL Lightweight revolutionized the concept of the ultra-lean "magnum-sized" folding knife. For those who prefer a bit more heft, this expression of the Stretch 2 XL design swaps the original injection-molded handle for one constructed with precision-machined gray G-10 scales, full, skeletonized stainless steel liners, and a stout stainless steel backspacer. Equally unique, the full-flat-ground blade of this knife is crafted from CPM CRU-WEAR—a specially formulated air-hardening tool steel enhanced by the Crucible Particle Metallurgy (CPM) process that offers superior wear resistance, excellent toughness, and an ultra-fine, extremely homogeneous grain structure. The PlainEdge™ blade of this knife is full-flat ground and satin finished for low-friction cutting performance and proudly features a fully accessible Trademark Round Hole™ for swift one-handed opening with either hand. A four-position clip enhances the knife's ambidextrous theme by offering a choice of left or right-side, tip-up or tip-down carry.

Endura®
 Lightweight Wharncliffe
 K390

C10FPWK390

To many savvy knife users, the Endura 4 is the perfect everyday carry cutting tool. Enhancing it with a Wharncliffe-style blade redefines that perfection and supercharging it with K390 MICROCLEAN® blade steel raises the bar even further. Specially developed to provide the extreme wear resistance and strength needed in the most demanding industrial applications, K390 is a state-of-the-art tool steel. The full-flat-ground Wharncliffe blade of this knife takes full advantage of these properties to deliver exceptional cutting performance, edge retention, and toughness. Whether you need scalpel-like precision or sheer cutting power, its perfectly straight edge is up to the task. All other features of this knife are consistent with the time-tested Endura 4 Lightweight, including a high-strength back lock mechanism, skeletonized stainless steel liners, a four-position pocket clip, and a lightweight fiberglass-reinforced-nylon (FRN) handle molded in the signature blue color of Spyderco's elite K390 family.

Lil' Native®
 Wharncliffe

C230GPWC

The original Wharncliffe blade pattern was created by an English nobleman who believed that its perfectly straight cutting edge and acute point would significantly enhance the functionality of the pocketknives of the day. Spyderco's Lil' Native Wharncliffe revitalizes that logic by empowering our compact, ultra-convenient Lil' Native with a full-flat-ground Wharncliffe-style blade. The spine of the satin-finished CPM S30V stainless steel blade curves gracefully downward to meet the straight cutting edge at an exceptionally keen point. Its edge and point tuck into an ergonomic handle featuring nested stainless steel liners, peel-ply-textured G-10 scales, a high-strength Compression Lock® mechanism, and a deep-pocket wire clip that is reversible for left or right-side tip-up carry. "Get it straight" when it comes to pocketknife performance. Get a Lil' Native Wharncliffe.

Lil' Temperance™ 3

Lightweight

C69SBK3

Edge Configurations

C69PBK3

C69SBK3

Spyderco co-founder Sal Glesser designed the lightweight, mid-sized RockJumper™ to fit the needs of outdoor enthusiasts and climbers. Based on the success of that popular model and feedback from its devoted users, Sal went back to the drawing board and created the LeafJumper. The LeafJumper features the same ergonomic handle design as its cousin, including its skeletonized stainless steel liners, fiberglass-reinforced-nylon (FRN) scales, non-slip Bi-Directional Texturing™, four-position pocket clip, stout back lock mechanism, and positive self-close function. Its VG-10 stainless steel blade also has a minimal ricasso (the unbeveled, full-thickness area nearest the handle) to offer the maximum edge length. What sets the LeafJumper apart, however, is its leaf-shaped blade. Full-flat ground, satin finished, and available in PlainEdge and SpyderEdge™ formats, it features a slightly upswept edge profile that raises and reinforces its point, increasing its versatility for many applications.

The original Lil' Temperance was designed by Spyderco co-founder Sal Glesser as a compact yet heavy-duty folding knife suitable for defensive use. Over the years, Sal has refined the design several times, emphasizing its utilitarian function without compromising its hell-for-stout spirit. The latest evolution of this venerable design transcends previous versions by replacing their traditional G-10 handle scales with injection-molded fiberglass-reinforced nylon (FRN). In addition to its light weight, FRN adds the extreme grip security of a deeply molded Bi-Directional Texture pattern. Stainless steel liners nested in the scales form the foundation of the knife's high-strength Compression Lock mechanism and anchor its broad-based, four-position pocket clip. The stout blade of the Lil' Temperance 3 is full-flat ground from VG-10 stainless steel and has a minimal ricasso to maximize its edge length. Available in a choice of PlainEdge or fully serrated SpyderEdge formats, the Lil' Temperance 3 Lightweight is a force to be reckoned with.

C148SBBK

Edge Configurations

C148PBL

C148SBL

The smallest member of Spyderco's popular Value Folder series, the Ambitious is an ultra-compact cutting tool that cuts with big-knife authority. In its lightweight configuration, it trades the G-10 scales of the original for injection-molded fiberglass-reinforced nylon (FRN) with a high-traction Bi-Directional Texture pattern. Taking that evolution one step further, the Ambitious Lightweight Black Blade cloaks the knife's full-flat-ground 8Cr13MoV stainless steel blade in a non-reflective black oxide coating. Consistent with that theme, the handle's full skeletonized stainless steel liners, four-position pocket clip, and other hardware also sport stealthy black coatings. Available in a choice of either PlainEdge or fully serrated SpyderEdge, both configurations feature a sturdy LinerLock mechanism to lock the blade securely open during use.

Following in the footsteps of its bigger brothers the Tenacious™, Resilience™, and Persistence™, this elite expression of the Ambitious Lightweight supercharges its performance with Crucible® CPM S35VN blade steel. The finely tuned chemistry of this American-made particle metallurgy steel promotes the formation of niobium carbides along with vanadium and chromium carbides, enhancing its toughness without sacrificing wear resistance. The full-flat-ground blade of this knife takes full advantage of these properties and is available in a choice of PlainEdge or fully serrated SpyderEdge formats. The satin-finished blade is housed in a handle featuring bright blue fiberglass-reinforced-nylon (FRN) scales, non-slip Bi-Directional Texturing, skeletonized full stainless steel liners, a stout LinerLock mechanism, and a versatile four-position pocket clip that provides a choice of left or right-side, tip-up or tip-down carry.

Manix™ 2

Brown G-10 CPM 15V®
Sprint Run

C101GPBN15V2

REVEAL

8

Designed by professional kayak fisherman Lance Clinton, the Siren is a full-service folding knife optimized for the needs of fishermen and watersports enthusiasts. This limited-edition Sprint Run celebrates the Siren design by rendering it with solid carbon fiber handle scales and a blade crafted from Crucible CPM S90V particle metallurgy stainless steel. The full-flat-ground, satin-finished, PlainEdge blade is supported by a stout back lock mechanism and proudly features a fully accessible Trademark Round Hole for swift, positive opening with either hand. The handle also features a reversible deep-pocket wire clip that balances secure, ambidextrous, tip-up carry with quick access.

This limited-edition Sprint Run expression of the Manix 2 showcases a blade crafted from CPM 15V. Boasting almost a 15 percent vanadium content, this remarkable material offers the highest wear resistance of any cold work tool steel available today. The full-flat-ground, satin-finished blade of this knife is further enhanced by a specialized heat-treating protocol developed by acclaimed custom knifemaker Shawn Houston. The result is a blade that offers extreme sharpness and unparalleled edge retention. To further distinguish this one-of-a-kind Sprint Run, it features brown G-10 scales with a non-slip peel-ply texture. All other aspects of this elite knife are consistent with the time-tested Manix 2 platform, including full skeletonized stainless steel liners, a stout Ball Bearing Lock™ mechanism, and a reversible pocket clip that provides a choice of left or right-side tip-up carry.

SpyOpera™
 Carbon Fiber Damasteel®
 Sprint Run

C255CFP

Elevating the SpyOpera design to all-new heights of sophistication, this Sprint Run proudly features a blade crafted from Thor™ pattern martensitic Damascus steel. Created by the Swedish firm Damasteel®, this extraordinary material is produced by a proprietary powder metallurgy process that forge welds layers of RWL 34 and PMC 27 into a state-of-the-art stainless Damascus steel. After the blade is precision machined and full-flat ground to final form, it is acid etched to reveal its intricate layered pattern. Equally distinctive, this knife's handle showcases solid carbon fiber scales painstakingly finished to offer smooth, ergonomic, crowned surfaces. All other features of this exquisitely crafted knife are consistent with the proven SpyOpera design, including thoughtfully crowned surfaces on the spine of the blade and lock bar.

Spyderco® by Vanquest® ADDAX-18 Backpack

The Spyderco by Vanquest® ADDAX-18 is a sleek, incredibly practical everyday carry (EDC) backpack that lets you show your Spyderco pride in discreet style. A proud member of Vanquest's low-profile Urban Series, this 18-liter backpack features a total of 15 dedicated pockets and slots and easily accommodates laptops and tablets up to 15 inches in size. Its structured body protects the contents and keeps the back upright for quick and easy access to every compartment. Crafted from 400-D UrbanBlend™ Nylon-Poly fabric and coated for superior water resistance, it features a weather-protected padded laptop and tablet compartment with YKK® AquaGuard™ zipper, ToughMesh™ pockets, collapsible bottle holders, dual luggage handle pass-throughs, and high-visibility loop-lined interior surfaces for easy attachment of hook-and-loop accessories. This exclusive Spyderco by Vanquest version of the ADDAX-18 also includes an external MOLLE-Air hook-and-loop panel for attachment of Velcro® patches, name tags, and other accessories, an embroidered Spyderco "bug" logo, and Spyderco-branded zipper pulls. As a special bonus, it also comes with a collectible Spyderco Velcro-backed PVC patch.

Wooden Kit Lil' Native®

WDKIT2

Enjoy a fun family project while teaching your children about pocketknives and how they work. Easily assembled without tools in just a few minutes, this kit yields a full-scale model of the popular Lil' Native®. Made entirely of maple, it folds just like the real thing, but has no sharp edges. For ages 7 and up, this educational kit includes complete step-by-step instructions. This wooden kit does not include a pocket clip.

Like the Wooden Dragonfly 2™ Kit, the Wooden Lil' Native kit is offered through all of our distribution channels.

REVEAL

10

A remarkable fusion of the manufacturing talents of Spyderco and BenShot, this American-made shot glass is embedded with a genuine LC200N Ladybug™ 3 blade that was crafted in Seki City, Japan. The unsharpened blade is further showcased by an etched Spyderco "bug" and logo on the front of the glass. A truly unique way of celebrating your Spyderco "spirit," this shot glass is only available for purchase at Spyderco.com and the Spyderco Factory Outlet store.
