

Spyderco®

2020
Spyderco™
REVEAL™
VOLUME
SIX

Welcome to Spyderco "Reveal" Volume 6!

Welcome to "Reveal" Volume 6, Spyderco's third new-product announcement of the year. This Reveal and Volumes 4 and 5 supplement the 2020 Spyderco Product Guide to provide a complete reference of our current product line, as well as introducing soon-to-be-released knives and accessories.

Due to the far-reaching effects of the COVID-19 pandemic, 2020 has been an extremely challenging year for everyone. In addition to maintaining our primary focus on the health and welfare of our staff members and their families, we have concentrated on adapting to the world's rapidly changing business landscape. Despite travel restrictions and social distancing, we have strengthened our relationships with our global manufacturing partners. Although trade shows and business trips have been canceled, we continue to work closely with our dealers, distributors, and customers to serve their needs and support their goals. Above all, we have redoubled our efforts to do what we do best—redefining the limits of high-performance production knives, sharpeners, and accessories and backing those products with the best customer service in the industry. We are proud to reveal the results of our latest efforts within these pages.

Spyderco is extremely grateful for our customers' continued passion for our products, especially at a time when our society faces unprecedented challenges. Thank you for supporting us in our efforts and for allowing us the privilege to serve you. We wish you and all those you hold dear continued health, safety, and security.

Respectfully,
The Spyderco Crew

The Pacific Salt 2 platform combines the highly refined ergonomics, grip texture, and four-position pocket clip of the iconic Endura® 4 Lightweight with ultra-corrosion-resistant materials. This all-new version of the Pacific Salt 2 further enhances the design with a full-flat-ground LC200N blade, a distinctive green FRN handle, and black-coated handle hardware and clip. Available with either a PlainEdge or fully serrated SpyderEdge, this fully ambidextrous design provides unparalleled cutting performance in and around the water.

The Atlantic Salt is a time-tested favorite among savvy mariners who appreciate its versatile combination of a blunt-tipped sheepfoot blade, a 50/50 index-finger choil, an integral shackle key, and ultra-corrosion-resistant materials. The newest version of this popular model raises the bar even higher with a blade crafted from LC200N, a nitrogen-enriched martensitic steel that is also fearlessly corrosion resistant, yet offers enhanced edge retention—especially in its PlainEdge™ format. Also available in an aggressive SpyderEdge™ configuration, its blade is full-flat ground for low-friction cutting performance and is supported by a sturdy back lock mechanism. The lightweight handle is injection-molded in the distinctive green color of the LC200N series and is home to a reversible pocket clip that provides ambidextrous tip-up carry.

K390 MICROCLEAN® is a state-of-the-art cold work tool steel made by Böhler-Uddeholm. Specially formulated to withstand the rigors of demanding industrial applications, its advanced alloy composition also makes it an exceptional blade steel—and the defining feature of an elite family of Spyderco lightweight knives. A proud new addition to this breed, the K390 Endela showcases this remarkable blade material in the perfect “in-between” size for an everyday carry knife. Its Bi-Directional Textured™ handle is also injection-molded in the distinctive blue color reserved for this high-performance family of cutting tools.

The Police 4 is the largest member of Spyderco's select family of lightweight knives featuring K390 MICROCLEAN tool steel blades. Ideal for extreme cutting challenges, it combines the toughness and superior edge-holding characteristics of K390 with all the proven qualities of this highly refined design—including the low-friction edge geometry of a full-flat-ground, PlainEdge blade, a fully accessible Trademark Round Hole, a high-strength back lock mechanism, and a four-position pocket clip.

Delica® 4 Lightweight Pink CPM S30V

C11FPPNS30V

Delica 4 Lightweight Pink CPM S30V Black Blade

C11FPPNS30VBK

Since its introduction 30 years ago, the Delica has been the platform for dozens of different combinations of blade steels, handle colors, and handle materials. This remarkable rendition of the Delica 4 Lightweight combines a full-flat-ground blade crafted from American-made CPM S30V stainless steel with a brilliant pink handle. The injection-molded handle includes Spyderco's signature Bi-Directional Texture pattern for a non-slip grip and a black four-position pocket clip configurable for all carry positions.

Black and pink is a bold color combination. This stunning variation of the Delica 4 Lightweight combines a titanium carbonitride (TiCN) coated CPM S30V stainless steel blade with a bright pink fiberglass-reinforced nylon (FRN) handle. To complement the rich, black finish of the blade, its four-position pocket clip and all other handle hardware also sport matching black coatings.

Pink Heals' mission is to provide communities with a program that supports people in need on a personal level in partnership with public safety and local businesses. For more information, please visit pinkheals.com.

The Tenacious has long been the flagship of Spyderco's incredibly popular Value Folder family of budget-friendly EDC cutting tools. The Tenacious Lightweight added the enhanced grip texture and vast color palette of injection-molded, fiberglass-reinforced-nylon (FRN) handle scales. Taking another quantum leap forward, the latest version of the Tenacious Lightweight proudly features American-made CPM S35VN blade steel. This advanced particle metallurgy stainless steel supercharges this workhorse folder and sets a new standard in affordable high performance. Available with a choice of PlainEdge or CombinationEdge blade, it also features a distinctive blue handle color.

Manbug™ Wharncliffe

MBKWP

Manbug Wharncliffe Black Blade

MBKWPBK

Spyderco's incredibly popular Manbug packs big-knife cutting performance into a diminutive package small enough to fit on a keychain. Now this pocket powerhouse is also available with a Wharncliffe blade. The perfectly straight cutting edge of its full-flat-ground VG-10 stainless steel blade offers phenomenal edge geometry and an exceptionally acute point. It is housed in a lightweight, injection-molded handle featuring non-slip Bi-Directional Texturing and a reliable back lock mechanism.

From a functional standpoint, knives with coated blades are most relevant to the needs of tactical users concerned with light discipline. Truth be told, though, many knife fans simply prefer the aesthetics of black blades. The black-bladed Manbug Wharncliffe is the perfect pocket companion for this crowd, offering the impressive cutting performance of a Wharncliffe blade cloaked in a non-reflective titanium carbonitride (TiCN) coating.

6

Made in China

Our micro-sized slipjoints are fully functional cutting tools small enough to fit on a keychain. Their Trademark Round Holes proudly identify them as Spyderco knives and offer convenient, fingernail-free opening. Painstakingly crafted from stainless steel, these remarkable knives are now available in a handsome all-black finish. Both the blades and handles have a durable black oxide coating that accentuates their no-nonsense functionality.

Birdseye
Maple

Chaparral™

Birdseye Maple

C152WDP

Spyderco's popular Sage Series has traditionally expressed the same iconic design with different lock mechanisms, paying homage to the innovative designers who created them. This rendition of the Sage 1 ushers in a new era by supercharging its Michael Walker LinerLock design with a blade crafted from Micro-Melt® Maxamet. Maxamet is an extremely hard powdered tool steel with properties that transcend conventional high-speed steels and approach those of cemented carbides. This knife's full-flat-ground, leaf-shaped blade is paired with a handle featuring full stainless steel liners, a reversible deep-pocket wire clip, and distinctive cool gray peel-ply-textured G-10 scales.

Spyderco's immensely popular Chaparral series celebrates a diverse range of handle materials by incorporating them into the same, sleek gentleman's folder format. This stunning expression of the Chaparral showcases genuine birdseye maple scales and the dramatic grain pattern characteristic of this material. All other features are consistent with the Chaparral platform, including a full-flat-ground CTS® XHP® stainless steel blade, stainless steel liners, a sturdy back lock mechanism, and a reversible deep-pocket wire clip.

Pattadese

C257GP

Spyderco's Pattada was a modern interpretation of the traditional resolza, the signature folding knife of the city of Pattada, Sardinia. The all-new Pattadese (pronounced pah-tah-day-say) takes that stunning design and scales it down by over 15 percent to make it even handier and more pocket friendly. A proud member of Spyderco's Ethnic Series™, the Pattadese's iconic blade shape is faithfully expressed in M390 stainless steel. The full-flat-ground PlainEdge blade is housed in a gracefully curved handle built with full stainless steel liners and beautifully contoured G-10 scales. A sturdy LinerLock mechanism ensures that the blade locks securely open when in use and a deep-pocket wire clip keeps the Pattadese poised for instant access by providing a choice of left or right-side tip-up carry.

10

RESTRICTED KNIVES

Automatic knives are federally restricted items. Sale of these items is limited to qualified personnel only, as defined in the statutory language of 18 U.S.C. Section 1716(g)(2)(1-4) and 15 U.S.C. Section 1244(2-4). You must also comply with all applicable local and state laws, statutes, and regulations related to the purchase and possession of automatic knives. Purchasing and/or possessing an automatic knife may subject you to criminal liability.

Qualified buyers are required to complete and physically sign an Acknowledgement & Representations Form (available through your Spyderco sales representative or downloadable from our web site at www.spyderco.com/opfocus). There will be absolutely NO SALES of restricted knives without this completed form and all other required documentation.

The Autonomy 2 took full advantage of the patented design features of the original Autonomy and molded them into a format optimized for everyday utility. Now this best-in-class automatic knife is available in a stealthy all-black configuration with a choice of edge styles. The ultra-corrosion-resistant LC200N blade is cloaked in a black Diamond-Like Carbon (DLC) coating and comes in a choice of PlainEdge, CombinationEdge™, or SpyderEdge™ configurations. The handle liners, clip, and all other hardware follow suit with their own non-reflective black coatings. Ideal for tactical environments where light discipline is a concern, the all-black Autonomy 2 is also a stunning aesthetic expression of one of Spyderco's most dynamic models.

Balisong

Spyderco's original SmallFly was a uniquely different "spin" on the balisong, or Filipino butterfly knife. Now this remarkable design is back with an all-new full-flat-ground, drop-point blade profile crafted from CPM S30V. Like the original, it features skeletonized twin handles with full stainless steel liners and peel-ply-textured scales. The Round Holes at the butt end of both handles reflect Spyderco's iconic trademark and help achieve optimal balance for high-speed manipulation. A spring-loaded latch attached to the "free" handle secures the handles together in the closed position, while the removable wire pocket clip may be attached to either side of both handles as both a carry option and tactile index.

12

CBN Benchstone

306CBN

Cubic Boron Nitride (CBN) is a high-tech superabrasive that is second in hardness only to diamond. Offering greater abrasion resistance and thermal conductivity than conventional abrasives like silicon carbide and aluminum oxide, CBN removes steel quickly and efficiently. Spyderco's new 3x8 benchstone combines the many advantages of CBN with a classic flat-stone format to supercharge traditional sharpening technique. The broad, perfectly flat carbon steel embryo of this stone is coated with fast-cutting 400-mesh CBN on one side and finer 800-mesh CBN on the other. Ideal for putting an edge on knives, this stone is also the perfect choice for sharpening wood chisels, plane irons, and similar tools and comes complete with a high-quality suede protective case.

Nylon Pouch Large

C12NC

Made in
USA

Nylon Pouch Small

C18NC

Made in
USA

Many of Spyderco's premium folding knives come in high-quality zippered pouches. Previously made from synthetic leather, these pouches have now been upgraded to a durable black nylon construction and proudly feature an embroidered gold Spyderco "bug" logo. Their plush, padded interiors provide the ultimate in scratch-free protection and a full-length zipper holds your knife safely and securely inside. Available separately, these pouches are 100% American made and fit knives up to 5.5 inches long when closed.

Made with the same superior made-in-USA quality as its larger counterpart, this zippered pouch accommodates knives up to 4.5 inches closed.

When Crucible® Industries created CPM S35VN™ for the cutlery industry, they formulated it to provide increased toughness over CPM S30V while maintaining the same level of edge retention. CPM S45VN takes that development a step further, adding Niobium and Nitrogen in place of some Vanadium and Carbon to provide a more finely tuned balance of edge retention, wear resistance, and corrosion resistance. The latest addition to Spyderco's remarkable Mule Team series, this CPM S45VN fixed-blade blank allows you to test, experience, and evaluate the properties of this steel for yourself. It's also the perfect basis for aspiring knifemakers to develop their handle and sheath-making skills with a genuine Spyderco blade.

Spyderco by Vanquest® Envoy-17™ Messenger Bag

BG02

Spyderco by Vanquest Envoy-17 Messenger Bag is available for purchase exclusively at Spyderco.com and the Spyderco Factory Outlet store

Spyderco is extremely proud of our Colorado heritage. To celebrate that pride, we created a unique Sprint Run expression of the Para Military 2 that allows us to show our Colorado colors in a distinctive way. It features a full-flat-ground PlainEdge blade crafted from Spyderco's proprietary CPM SPY27 stainless steel. Both sides are beautifully laser engraved with flowing American flag images, and the blade is paired with G-10 scales printed with the Colorado state flag logo. This limited-edition knife will only be sold consumer direct at the Spyderco Factory Outlet store or through Spyderco.com.

The "Spyderco by Vanquest" Envoy-13 messenger bag was a remarkable co-branding effort between Spyderco and Vanquest—one of the premier manufacturers of high-performance nylon gear. For those who use larger laptops or just prefer greater carrying capacity, we are proud to announce an "upsized" version—the "Spyderco by Vanquest" Envoy-17. Sized to accommodate laptops or tablets up to 17 inches in size, this expertly crafted bag is made with ultra-durable 1000-D and 500-D Cordura® nylon and YKK® zippers. Its 22 strategically located pockets and slots include a quick-access loop-lined concealed-carry compartment, collapsible bottle holders at each end that accept 32oz (1L) Nalgene bottles, and multiple locations suitable for keeping knives and other everyday essentials at your fingertips. Embroidered logos on the inside and outside of the flap and molded on all its high-visibility zipper pulls proudly proclaim its Spyderco identity.
