

# 2023 NEW PRODUCT REVEAL

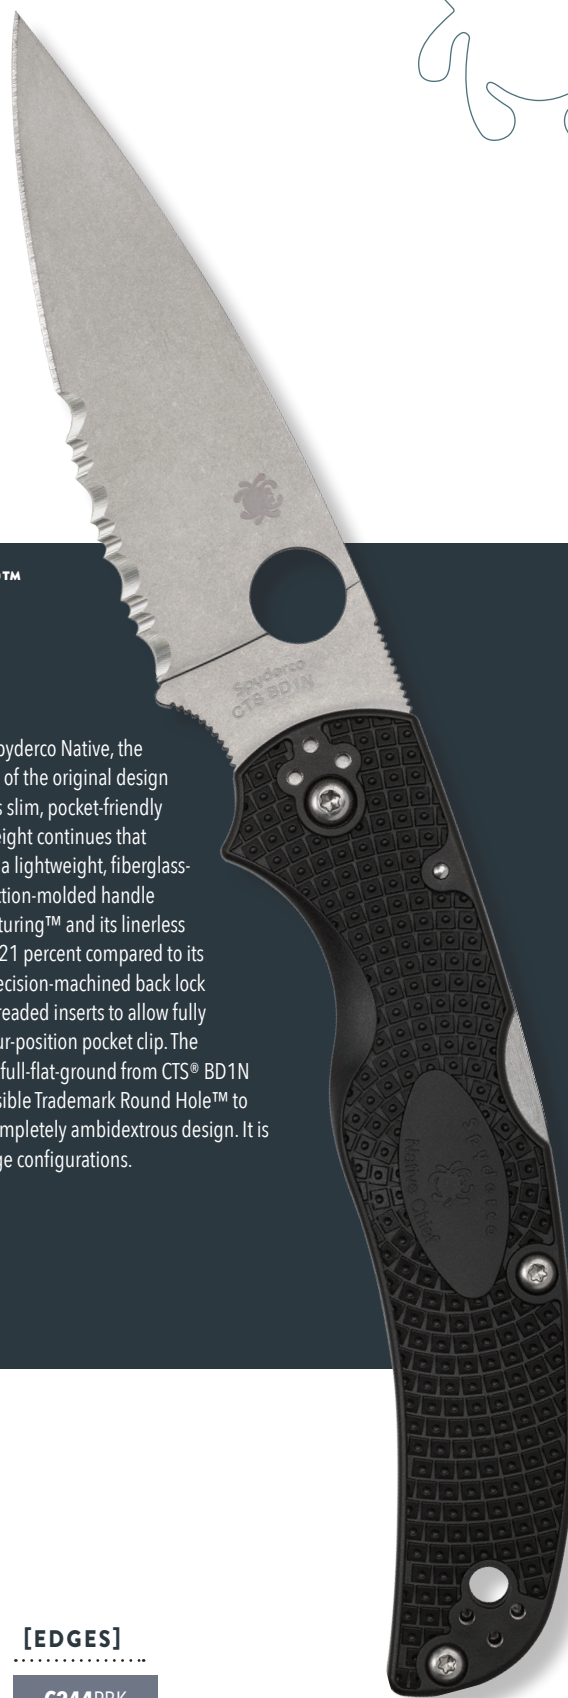

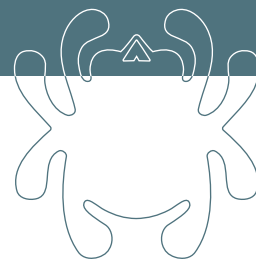

## WELCOME TO SPYDERCO'S “REVEAL” VOLUME 13!

Welcome to Spyderco's "Reveal" Volume 13, our second new-product announcement of 2023. This Reveal introduces our latest products and, together with Reveal 12 and our 2023 Product Guide, presents a detailed reference of Spyderco's complete selection of knives, sharpeners, accessories, and apparel.

The items featured in this Reveal reflect the broad scope of Spyderco's product line and, we hope, include something for every knife enthusiast's taste. From our Golden, Colorado, factory, we are proud to announce Michael Janich's latest design, the compact MicroJimbo™, a lightweight expression of the Native Chief™, several exciting variations of the award-winning Military™ 2, and a version of the popular UK Penknife™ featuring our proprietary CPM® SPY27® steel. Fans of exotic, high-performance blade steels will find we have supercharged some of our current models with K390 and CPM M4 and added a new Mule Team™ blade showcasing Böhler-Uddeholm's K294 MICROCLEAN® tool steel. For collectors and sophisticated knife users, we have several distinctive Sprint Run™ designs, including limited-edition expressions of Nati Amor's Subvert™ and Zome-handled versions of the Delica® 4 and Dragonfly™ 2 boasting three-layer Aogami Super Blue/SUS410 laminate blades. Finally, we have expanded our line of accessories and apparel to include SharpKeeper™ kitchen-knife blade guards, several new Spyderco-logoed shirts, and trucker-style hats.

We sincerely hope you enjoy this Reveal and appreciate our tireless efforts to provide "something for everyone" in our new-product offerings. Thank you for your continued trust and confidence and for being part of the Spyderco community.

*Respectfully,*  
**The Spyderco Crew**

## NATIVE CHIEF™ LIGHTWEIGHT C244PSBK

An "extended" version of the timeless Spyderco Native, the Native Chief stretches the overall length of the original design by about one third while maintaining its slim, pocket-friendly profile. The all-new Native Chief Lightweight continues that evolution, replacing its G-10 scales with a lightweight, fiberglass-reinforced-nylon (FRN) handle. The injection-molded handle includes high-traction Bi-Directional Texturing™ and its linerless construction trims the knife's weight by 21 percent compared to its G-10 counterpart. It retains the same precision-machined back lock mechanism and includes four sets of threaded inserts to allow fully configurable mounting of the knife's four-position pocket clip. The blade of the Native Chief Lightweight is full-flat-ground from CTS® BD1N stainless steel and features a fully accessible Trademark Round Hole™ to complement the knife's symmetrical, completely ambidextrous design. It is also available in a choice of all three edge configurations.

## NATIVE CHIEF LIGHTWEIGHT BLACK BLADE

**C244***SBBK*

The Native Chief Lightweight's remarkable balance of light weight and full-service cutting performance make it ideal for tactical applications. To make it even better suited to that role, this expression of it adds a non-reflective Diamond-Like Carbon (DLC) coating to the CTS BD1N stainless steel blade and matching black coatings to the lock bar, clip, and other handle hardware. Available with a choice of a PlainEdge™, CombinationEdge™, or SpyderEdge™ blade, the all-black Native Chief Lightweight is an exceptional synthesis of low profile and high performance.

## NATIVE CHIEF

### LIGHTWEIGHT CPM® SPY27®

**C244PCBL**

Developed in close cooperation with Crucible® Industries, CPM SPY27 is a cobalt-enriched stainless steel that enhances the time-tested chemistry of Japanese VG-10 with the Crucible Particle Metallurgy (CPM) process. This state-of-the-art method wrings maximum performance out of the steel by reducing alloy segregation and ensuring a fine, homogenous microstructure. Proprietary to Spyderco, this high-performance blade material is renowned for its ability to get "sticky sharp," while balancing edge retention, toughness, and corrosion resistance. This Native Chief Lightweight proudly showcases this elite steel in its full-flat-ground blade and further highlights it with a signature cobalt-blue FRN handle.

## MICROJIMBO™ C264<sub>GP</sub>

The MicroJimbo distills all the key features of Michael Janich's acclaimed Yojimbo™ 2 design into a smaller, more legally compliant package. At the same time, its critical dimensional relationships, including the "cockpit" in the center of the knife, are identical to its bigger brother. The result is an ultra-compact folder that deploys and handles like its full-sized counterpart. The MicroJimbo's CPM S30V® Wharcliffe blade measures 2.45 inches (62mm) to comply with strict blade-length laws and features a full-flat grind for enhanced tip strength. It is supported by a high-strength Compression Lock® mechanism and stainless steel liners nested within peel-ply-textured G-10 scales. To balance discreet carry and instant accessibility, it includes a deep-pocket wire clip reversible for left or right-side tip-up carry.

## MICROJIMBO BLACK BLADE C264<sub>GPBK</sub>

This expression of the compact MicroJimbo adds a stealthy black Diamond-Like Carbon (DLC) coating to its full-flat-ground CPM S30V blade. Consistent with that theme, the handle's stainless steel liners, reversible deep-pocket wire clip, and all other hardware also boast matching black coatings. Compact and non-reflective, it's the perfect low-profile companion.

## MILITARY™ 2 BLACK BLADE

C36GPBK2

Like its predecessor, the revered Military Model™, the Military 2 was born and bred to serve. The improvements that define the second-generation of this design make it the perfect cutting tool for duty-bound applications. This version enhances it even further by cloaking the blade in a stealthy Diamond-Like Carbon (DLC) coating that eliminates reflection in operational environments where light discipline is a priority. To complement the blade's DLC finish, the handle's stainless steel liners, pocket clip, and hardware also feature matching black coatings. Available with a choice of all three edge configurations, this all-black expression of the Military 2 is the ultimate fusion of low profile and high performance.

## MILITARY 2 DIGITAL CAMO

### C36GPCMO2

This expression of the Military 2 proudly includes all the defining characteristics of this landmark design, including a high-strength Compression Lock, a versatile four-position pocket clip, and finely tuned handle ergonomics. Its defining feature, however, is its handle, which showcases peel-ply-textured G-10 scales in a digital camouflage pattern.

## MILITARY™ 2 COMBINATIONEDGE™ AND SPYDEREDGE™

**C36GPS2**  
**C36GS2**

The second-generation Military 2 redefined this iconic design with a high-strength Compression Lock, a fully configurable four-position pocket clip, and highly refined ergonomics. For users whose needs often include cutting fibrous materials like rope and webbing, the Military 2 is now also available in partially serrated CombinationEdge and SpyderEdge blade configurations. The addition of Spyderco's signature serration pattern to the edge not only enhances the cutting power of its full-flat-ground, CPM S30V blade, but marks the first time a fully serrated version of the Military has been manufactured in over a decade.

## LEAFJUMPER™ K390

**C262**PBLK390

Inspired by Sal Glesser's original RockJumper™ design, the LeafJumper is a mid-sized, back lock folding knife with a wide, ergonomic handle and a versatile leaf-shaped blade. This elite expression of it supercharges the design with Böhler-Uddeholm's K390 MICROCLEAN blade steel. A state-of-the-art tool steel created to withstand the rigors of industrial cutting, blanking, and punching operations, K390 offers exceptional strength and edge retention when used in knife blades. The K390 LeafJumper is available in both PlainEdge and fully serrated SpyderEdge configurations and its Bi-Directional Textured fiberglass-reinforced-nylon (FRN) handle is molded in the distinctive blue color reserved for Spyderco's elite K390 family of knives.

## MANBUG™ LEAF

MBKLFP  
MBKLFS

Originally created as a slightly broader, more masculine expression of our classic Ladybug™, the Manbug is a keychain-sized back lock folding knife that cuts with authority far beyond its size. The latest version of this popular design showcases Spyderco's iconic leaf-shaped blade profile. Inspired by the shape of a bamboo leaf, the graceful curves of its full-flat-ground VG-10 stainless steel blade center its point and provide an exceptional balance of edge geometry and point utility. To cater to all user preferences, it is available in both PlainEdge and SpyderEdge configurations.

## UK PENKNIFE™

CPM SPY27

**C94**PCBL

Originally designed to comply with restrictive British knife laws, the UK Penknife has developed a cult following among pocketknife enthusiasts worldwide. The original SLIPIT™ model, it combines one-hand opening via our Trademark Round Hole with the convenience and accessibility of clip carry. This unique expression of it showcases a full-flat-ground blade crafted from CPM SPY27, a cobalt-enriched particle metallurgy stainless steel developed specifically for Spyderco. The blade is complemented by fiberglass-reinforced-nylon (FRN) handle scales molded in a distinctive cobalt blue that is one of the signature colors of our family of knives featuring this proprietary steel.

## TENACIOUS™ BROWN G-10 CPM M4

**C122**GBNM4P  
**C122**GBNM4PS

This remarkable expression of the Tenacious elevates this best-selling design to all-new heights with a blade crafted from American-made CPM M4 tool steel. Produced by the particle metallurgy process, CPM M4's sophisticated alloy composition, high vanadium content, and extremely fine grain structure give it exceptional wear resistance and toughness—properties that translate to outstanding edge retention and impact resistance in knife blades. This knife's full-flat-ground blade is available in both PlainEdge and CombinationEdge formats and is housed in a handle featuring brown peel-ply-textured G-10 scales.

## ENUFF™ 2

### K390 SPYDEREDGE

### FB31SBL2K390

Based on extensive customer feedback, Spyderco co-founder Sal Glesser redesigned the original Enuff fixed blade to create the longer, leaner Enuff 2. We then supercharged the design with the addition of Böhler-Uddeholm's K390 MICROCLEAN tool steel, which is renowned for its extreme strength and edge retention. This expression of the Enuff 2 takes that evolution a step further with the addition of Spyderco's aggressive SpiderEdge serration pattern. The ultimate cutting tool for tough, fibrous materials, this Enuff 2 features signature blue FRN scales and an injection-molded polymer sheath with G-Clip™ attachment.

## SHARPKEEPER™ BLADE GUARDS

### SK01/SK02/SK03/SK04/ SK05/SK06

Keep yourself and your prized kitchen knives well protected with Spyderco's SharpKeeper blade guards. Molded from tough thermoplastic and lined with a soft cloth liner, SharpKeepers encase the knife's blade securely without scratching it or dulling the edge. Ideal for storing knives safely in a drawer or transporting them to parties and picnics, SharpKeepers also feature a decorative pattern of drying holes to vent moisture.

SharpKeeper blade guards come in six different sizes to fit all common kitchen knives:

- SK01: Up to 2.5-inch (64mm) blades
- SK02: Up to 3.5-inch (89mm) blades
- SK03: Up to 4.5-inch (114mm) blades
- SK04: Up to 7.0-inch (178mm) blades
- SK05: Up to 8.0-inch (203mm) blades
- SK06: Up to 10.25-inch (260mm) blades

## SPYDERCOIN™ 2023 COIN<sub>2023</sub>

The 2023 SpyderCoin honors Spyderco's unwavering support of our nation's law enforcement and military personnel and their dedication to preserving our way of life. A vivid reflection of our company values, it reminds us that "It is the responsibility of good to stop evil from hurting the innocent," and encourages us to "Never give up," "Never back up," and "Never back down." This coin is custom minted in a unique Reuleaux triangle shape, color filled with blue and white enamel, and proudly bears the Spyderco logo and the year "2023."

## SUBVERT™ CARBON FIBER CPM 20CV SPRINT RUN™

**C239**CFP

Designed by Israeli goldsmith and custom knifemaker Nati Amor, the Subvert faithfully translates his handcrafted "Sabotage" folder into a premium-quality production knife. This elite Sprint Run expression of it further elevates the design by rendering its dramatically styled, full-flat-ground blade in CPM 20CV. This highly wear resistant, powder metallurgy stainless steel contains a high volume of vanadium carbides and the highest amount of chromium of any vanadium-rich stainless steel currently available, giving it a remarkable combination of edge retention, corrosion resistance, and toughness. Equally unique, the beautifully contoured scales of this knife are precision machined from solid carbon fiber. All other features are consistent with the standard version of the knife, including ball-bearing pivot washers, thick, skeletonized titanium liners, a stout LinerLock mechanism, and a custom pocket clip configured for right-side, tip-up carry.

## STRETCH™ 2 XL

BLUE NISHIJIN GLASS FIBER  
DAMASCUS SPRINT RUN

**C258***GFB LP*

This tour-de-force expression of the Stretch 2 XL showcases a blade crafted from D.P.S. 15 Damascus steel. This remarkable material consists of a VG-10 stainless steel core sandwiched between two outer billets of Damascus, each composed of 15 layers of forge-welded steel. When the blade is full-flat ground and acid etched, it reveals its breathtaking 31-layer pattern-welded construction. The elite blade of this knife is then paired with a handle featuring full stainless steel liners and blue Nishijin glass fiber scales. Inspired by a 1,200-year-old Japanese method of textile weaving, this material translates the meticulous, colorful detail of the original Nishijin art form to a stunningly beautiful state-of-the-art glass fiber.

## DELICA® 4

LIGHTWEIGHT BLUE/  
GRAY ZOME SUPER  
BLUE/SUS410 SPRINT RUN

### C11ZFGYBLP

This limited-edition expression of the Delica 4 features a three-layer laminate blade with an Aogami Super Blue tool steel core and SUS410 stainless steel outer layers. Renowned for its extreme sharpness and edge retention, Aogami Super Blue combines the same superior-quality iron sand used to craft legendary Japanese swords with high-tech modern alloys. It is clad between SUS410 outer layers that enhance the blade's structural strength and toughness. Equally unique, this knife's fiberglass-reinforced nylon (FRN) handle showcases a stunning two-tone blue-gray Zome treatment. Individually brush dyed by Japanese artisans, this remarkable process makes every one of these knives an individual work of art. This limited-edition knife is only sold consumer direct at the Spyderco Factory Outlet store or through Spyderco.com. It was released for sale prior to publication of this Reveal, so availability is not guaranteed.

## DRAGONFLY™ 2

LIGHTWEIGHT BLUE/  
GRAY ZOME SUPER BLUE/  
SUS410 SPRINT RUN

**C28ZFGYBLP2**

This highly collectible variation of the Dragonfly 2 showcases a three-layer laminate blade. The blade's Aogami Super Blue tool steel core provides an exceptionally keen and long-wearing edge and is supported by the strength and toughness of SUS410 stainless steel outer layers. Full-flat ground and satin finished to reveal its laminate lines, it is paired with a stunning two-tone blue-gray Zome handle. The injection-molded FRN handle is meticulously brush dyed by an expert Japanese artisan to create a distinctive, one-of-a-kind pattern that makes every knife an individual work of art. To complement its satin-finished blade, this knife's reversible deep-pocket wire clip and all other handle hardware are also brightly finished. This limited-edition knife is only sold consumer direct at the Spyderco Factory Outlet store or through Spyderco.com. It was released for sale prior to publication of this Reveal, so availability is not guaranteed.

## DRAGONFLY 2

## MULE TEAM™

K294

MT36P

Spyderco's unique Mule Team Series enables knife enthusiasts to test the performance of different blade steels using the same exact fixed-blade design platform. Sold without handles or sheaths, Mule Team blades are also the perfect "kit blades" for hobbyists and novice knifemakers. This Mule Team blade features Böhler-Uddeholm's K294 MICROCLEAR tool steel. Manufactured in Sweden using their third-generation powder metallurgy technology, K294 is essentially an expression of A11 tool steel enhanced by the benefits of the powder metallurgy process. Also comparable to Crucible Industries' CPM 10V®, it is most often used in demanding cold-work tooling applications requiring extreme wear resistance and compressive strength. As a blade material, its wear resistance translates into outstanding edge retention, especially when used to cut abrasive materials. All Mule Team blades are sold consumer direct and available only at the Spyderco Factory Outlet or through Spyderco.com.

### [TECH SPECS]

OVERALL: **7.63in 194mm**

BLADE: **3.50in 89mm**

## HAT13

Gray/gray with a brown leather patch and  
"Reliable High Performance" logo

## TRUCKER HATS WITH LEATHER SPYDERCO PATCHES

Use your head in more ways than one with these distinctive Spyderco-logoed trucker hats. Made by Richardson, these classic mid-profile trucker hats feature a moisture wicking 60/40 cotton-poly blend front panel and a breathable nylon mesh back. On the front panel above the precurved visor, they proudly showcase a handcrafted genuine leather patch with a Spyderco logo. A snap-style back strap provides one-size-fits-most adjustment from 7 to 7-3/4 inches. These high-quality hats are available in three color combinations.

## HAT14

patch and "Reliable High Performance" logo

Sold consumer direct only,  
available from the Spyderco Factory  
Outlet or through Spyderco.com

## ORVIS® MEN'S TECH CHAMBRAY WORK SHIRT

BLACK SHORT SLEEVE

WS04MS-XXL

## ORVIS MEN'S TECH CHAMBRAY WORK SHIRT

BLUE SHORT SLEEVE

WS05MS-XXL

Made by Orvis, these high-quality short-sleeve work shirts feature a 50/50 blend of polyester and MarinoWul+ recycled polyester. Eco-friendly, moisture-wicking, and temperature-regulating, they are also machine washable, wrinkle resistant, and anti-static and are treated with OutSmart® Fresh for odor control. These stylish shirts feature two chest pockets and are available in a choice of black or blue. Both are proudly embroidered with a circular logo of the Spyderco bug and our "Reliable High Performance™" motto. Sold consumer direct only, these shirts are available from the Spyderco Factory Outlet or through Spyderco.com.

## ORVIS WOMEN'S TECH CHAMBRAY WORK SHIRT

BLUE LONG SLEEVE

WS03WS-XL

For ladies who want to show their Spyderco pride in style and comfort, these high-quality long-sleeve work shirts feature a 50/50 blend of polyester and MarinoWul+ recycled polyester. Made by Orvis, these machine washable, wrinkle-resistant shirts are anti-static and treated with OutSmart® Fresh for odor control. They feature a single chest pocket and are proudly embroidered with a circular logo featuring the Spyderco bug and our "Reliable High Performance™" motto. Sold consumer direct only, these shirts are available from the Spyderco Factory Outlet or through Spyderco.com.
